المجلد الثالث

الكهرطيسية والضوء

جدعت الكهرطيسية ظواهر متعددة ومتشعبة في إطار واحد هي الظواهر الكهرطيسية والمغناطيسية والهيوليد. فوضعت بذلك أسس الثورة الصناعية المتتالية، للحركات والذرات الكهرطيسية، لتبوءات، الأثرية، الاتصالات السلكية واللاسلكية وغيرها. لقد اكتسبت الأهمية تجريبياً ونظرياً بين هذه الظواهر تدريجياً من خلال أعمال أمبير، فاراداي، ألوارد وأخرين عديدين في النصف الأول من القرن التاسع عشر. تم توحيد أعمال ماكسويل في مطلع الثلث الأخير من هذا القرن ما وصل إليه من سيلوود.

أسس الفيزياء المعاصرة

المجلد الرابع

الميكانيك الكومبي

إن ميكانيك الكم هو ميكانيك الأجسام المعجزية بامتياز، الذرة ومكوناتها، الذرات والذرات، التي يستعمل فيها بآعين للذرات. تتجمع هذه الأجسام للذرات لتختلف اختلافاً جذرياً عن القوانين المنطقة لمركب الأجسام المعجزية التي درسناها في الميكانيك التقليدي، إذ تزل في الميكانيك المعجزية مفاهيم عديدة، على رأسها مفهوم الشار، لتعمل مثل مفاهيم أخرى لا تقوم على النواص والحساس ولا يمكن إلتاني التليا بسلوود.

أسس الفيزياء المعاصرة

المجلد الخامس

الفيزياء الإحصائية

تتعدد بالفيزياء الإحصائية فيزياء مجموعات كبيرة من الجسيمات العاصفة إلى الميكانيك الكومبي، لقد رتبنا أن الإحصائ الجوهري بين الميكانيك التقليدي وميكانيك الكم هو فيزياء الأخر، في صيغته الحالية، بالنسبة الإحصائية لتعداد كذا أقسام أسس الترموديناميك على الميكانيك التقليدي المنطق على أعداد كبيرة من الجسيمات، إلا أن كل هذه الأعداد التي يجعل من لتسليط تتبع حركاتها الفردية دفعا إلى إدخال مفاهيم وغواص لتضع لها المجموعات الكبيرة.

أسس الفيزياء المعاصرة

أسس الفيزياء المعاصرة

يهدف هذا الكتاب إلى إعطاء صورة واضحة ومبسطة وشاملة للأسس التي تقوم عليها الفيزياء، وتغطية المواضيع التي تعتمد أن على الفيزياء استيعابها في التراميل الجامعية الأولى. وقد حاولنا الوصول إلى هذه الغاية الأحدث بين الاعتبار ضرورية الانتقال من المفاهيم والمبادئ كما يعيها الفيزيائيون المعاصرون ومن الأهداف التي وضعها مختلف الباحثين نسب أيهم. وقد سمح لنا تجنب التكرار الناتج عن الانتقال من العرض الوصفي إلى العرض الرياضي استناد الموضوع والتكرس حيز أكبر للغة الواحدة التي يمكن أن نصف الطبيعة وتسلقها وتعني بذلك الرياضيات. ويتضمن مستوى هذه التحفلات للواد كما درسناها خلال سنوات عديدة لتجاوز العقدين في جامعتي الرباط ومدني وقرطبا في لترستين الجامعتين الأولىين ونسأ طليقاً مما درسناه في المرسته بعد الجامعية.

المجلد الأول

الميكانيك التقليدي والنسبوي

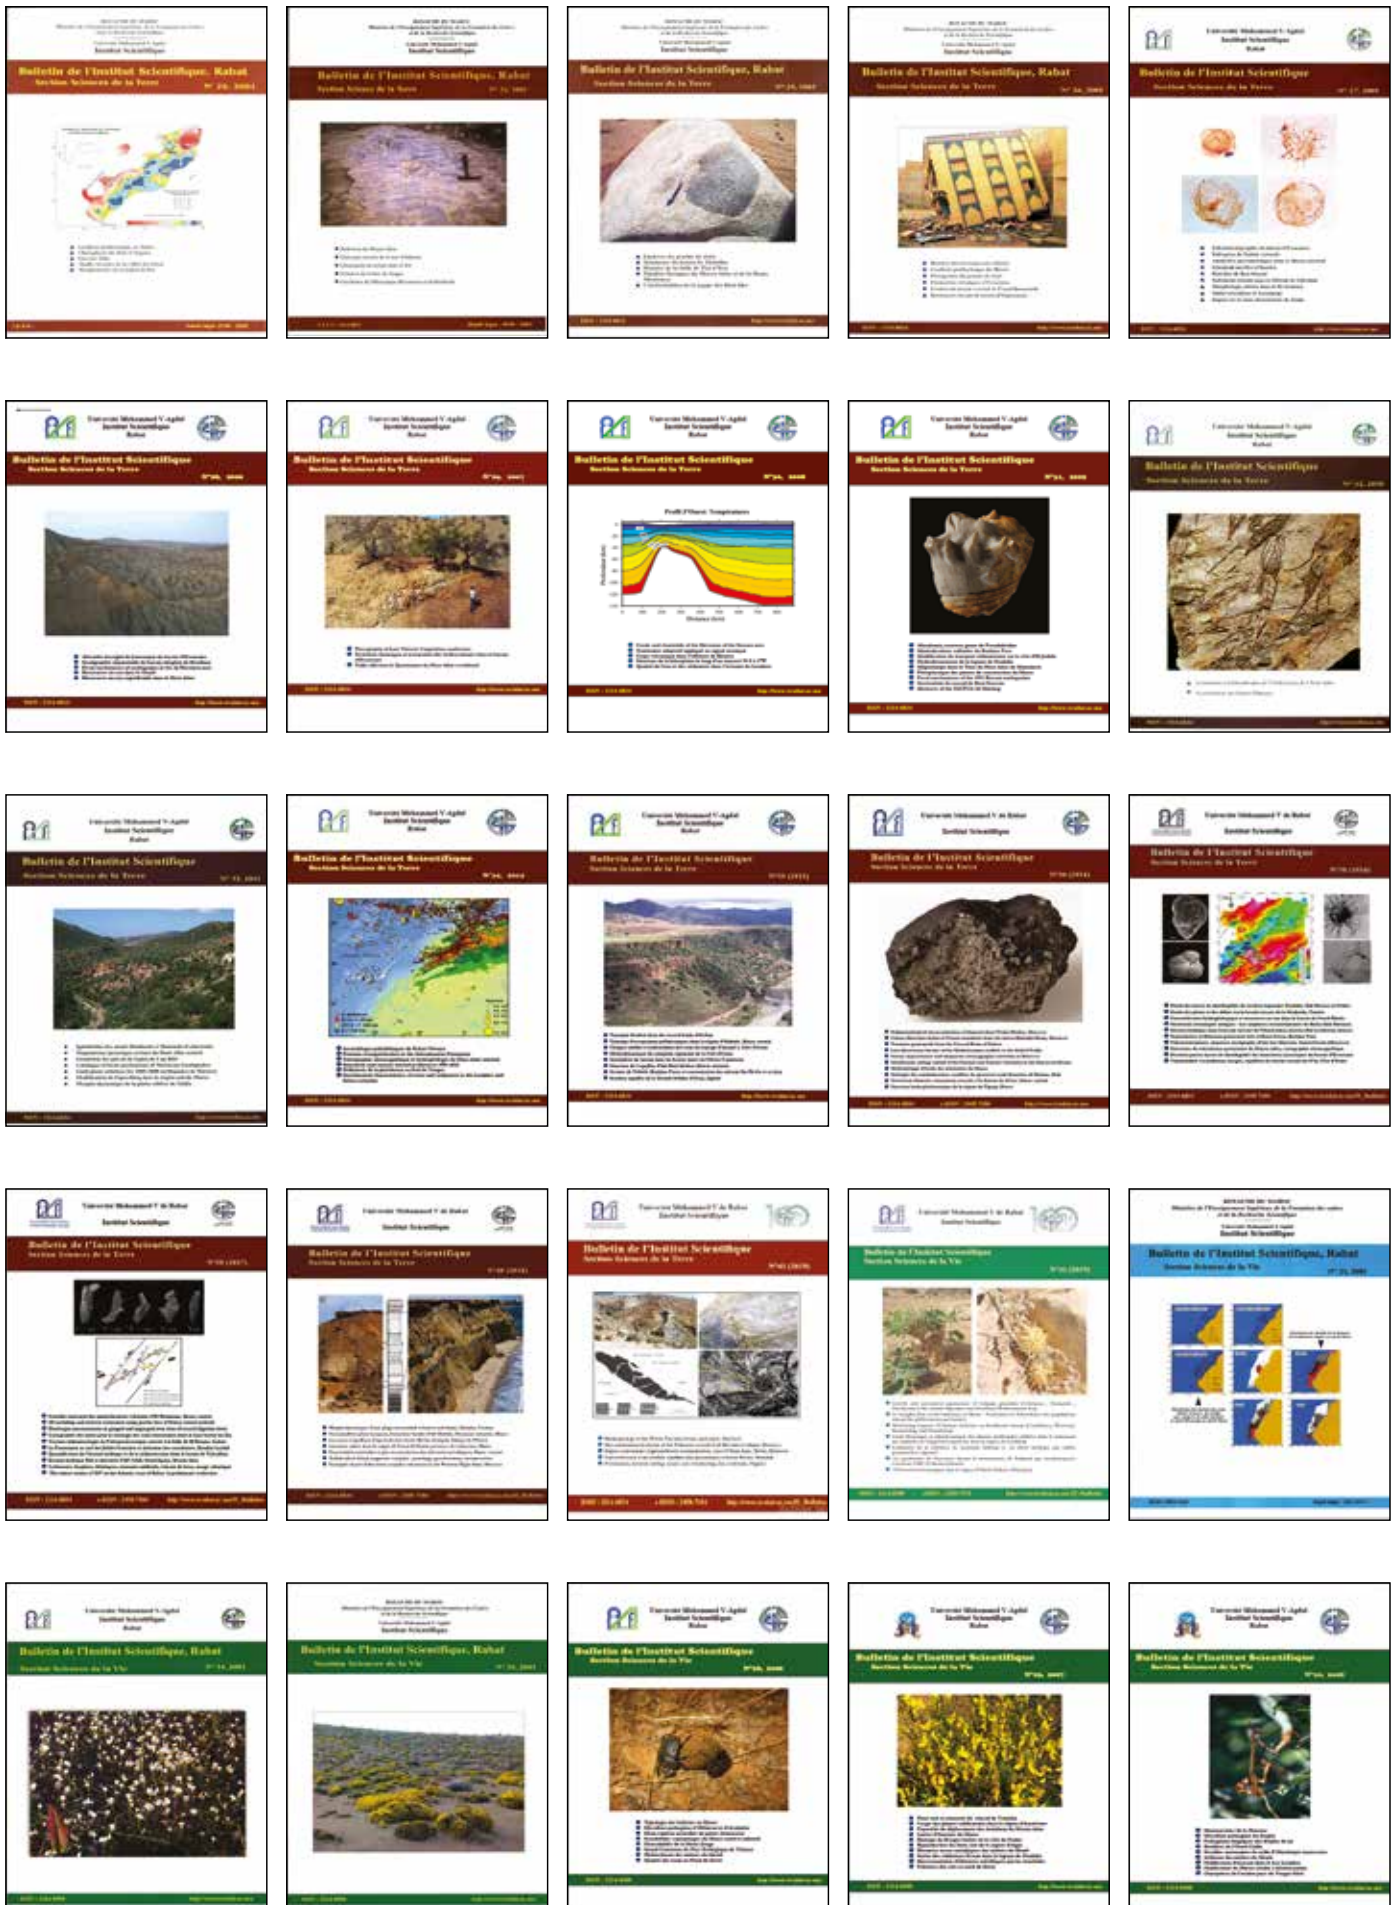

إن موضوع الميكانيك التقليدي هو دراسة حركة جسم ما تحت تأثير قوى معينة عليه واختيار أفضل الوسائل لرصد هذه الحركة - اختيار نظم المعاور المناسبة، إن هذه القوى تسمى وجود أجسام أخرى أتجنبها، ولذا فإن موضوع الفيزياء، هو في واقع الأمر دراسة تفاعل الأجسام فيما بينها وموضوع الميكانيك هو دراسة حركتها بالنسبة لبعضها بعضاً نتيجة هذا التفاعل.

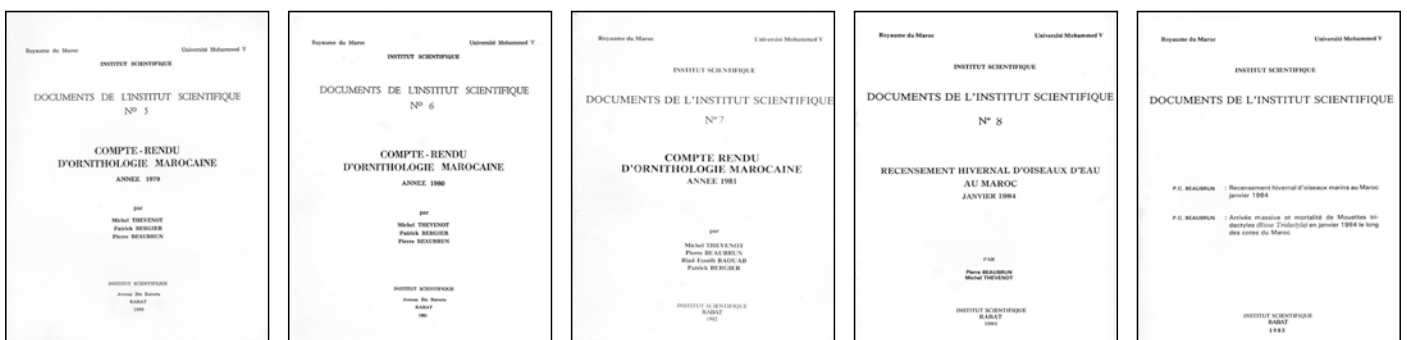

المجلد الثاني

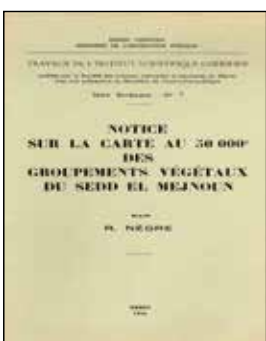

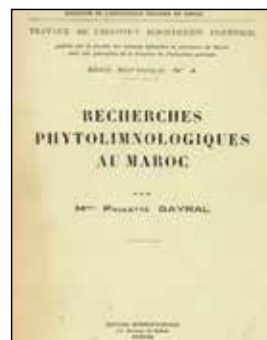

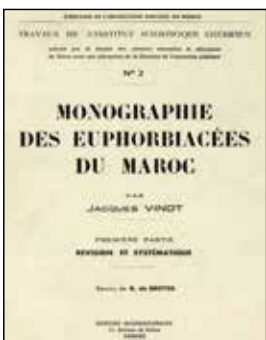

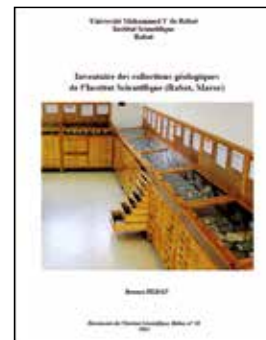

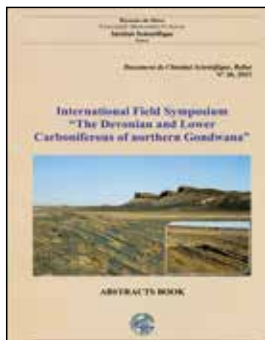

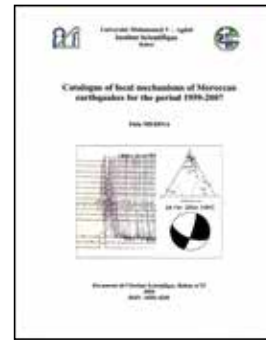

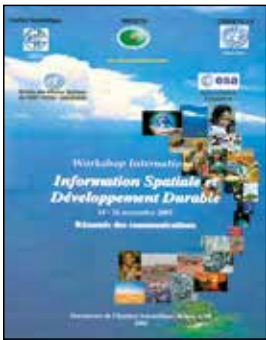

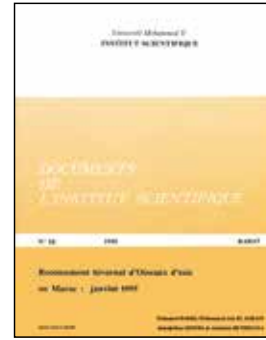

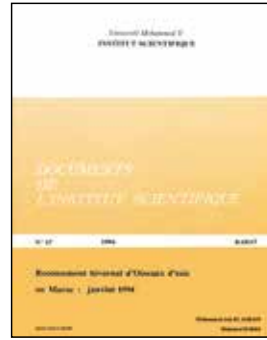

الميكانيك الإحصائي والترموديناميك

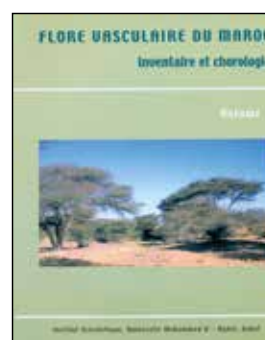

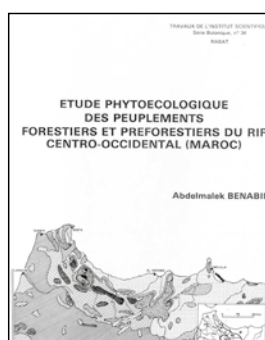

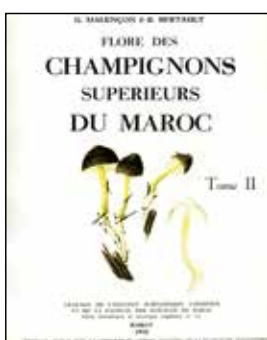

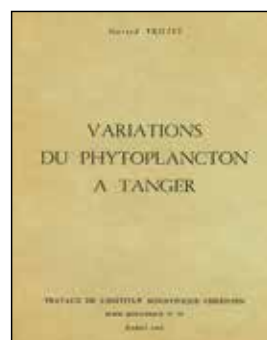

لقد أخذنا عرض الترموديناميك من وجهة النظر النظرية - على ما في العرض التاريخي من ميزات يديولوجية أحياناً - وكوننا هذا المنهج الميكانيك الإحصائي والترموديناميك، لرس وألنا التمدداً هذه الطريقة من المنهج في كل هذا الكتاب بحسب وأما كذلك ما يتوجب للمفاهيم الترموديناميك، كمية الحرارة ودرجة الحرارة والأنتروبية على وجه الخصوص، من عرض في العرض التقليدي يحصر استعمالها.

 par C. FOUZOUZ et J. BONÉ

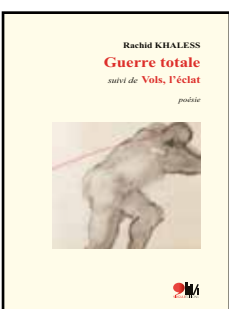

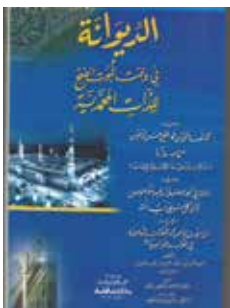

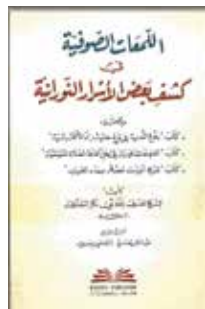

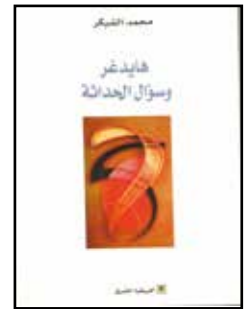

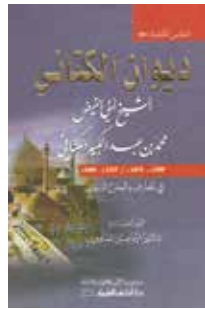

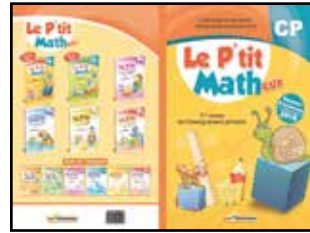

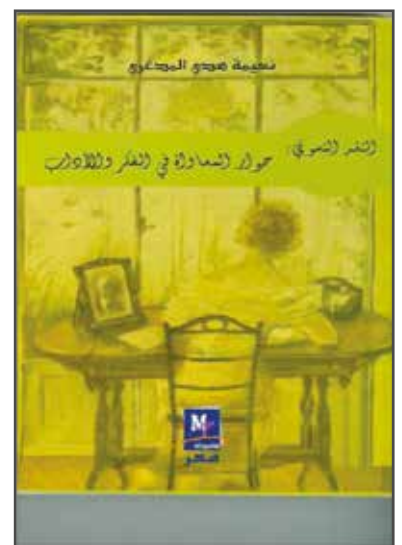

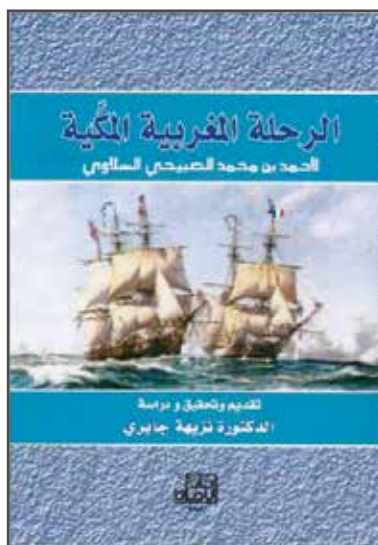

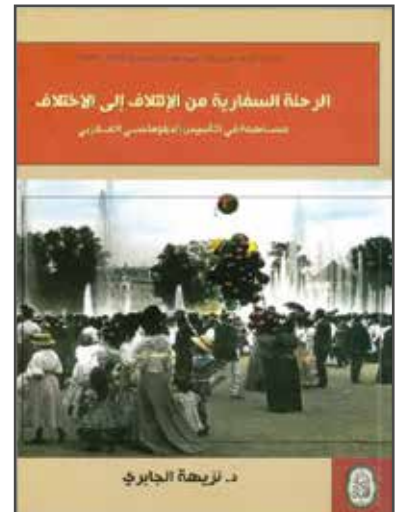

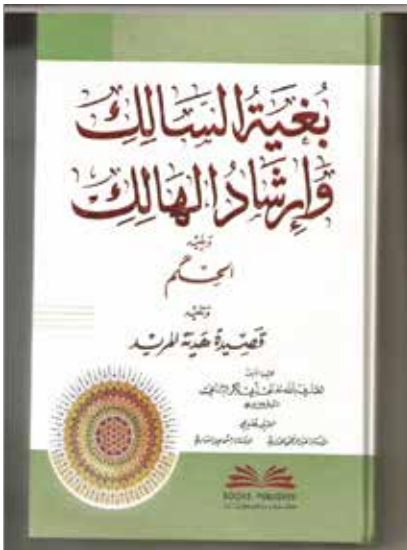

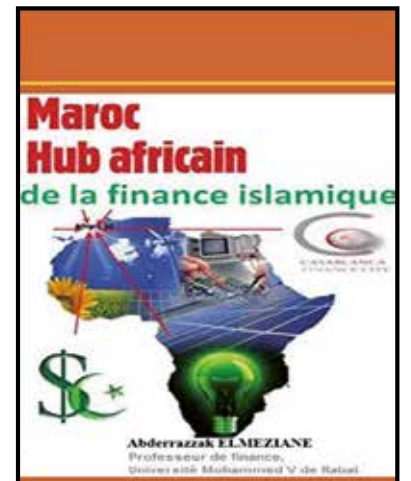

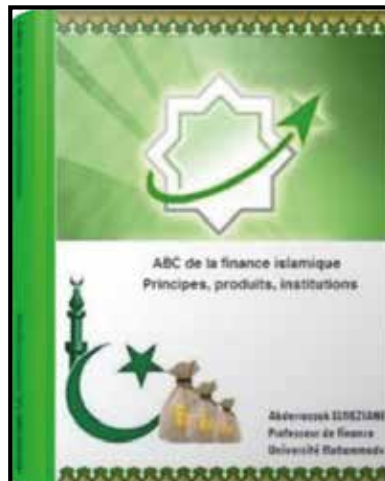

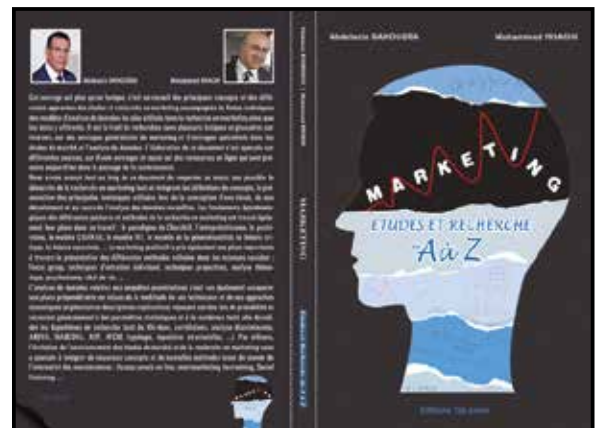

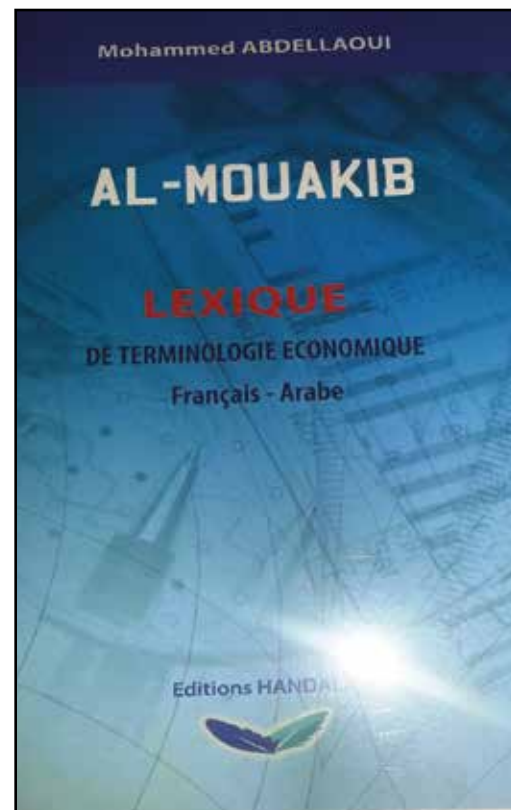

Les fermes de volailles issues de Certification et la concentration des élevages avicoles au Maroc posent un problème environnemental et de santé publique à cause de leur charge en polluants. Nous nous sommes intéressés à ce problème selon deux objectifs : bioconversion des fientes et tentatives de leur valorisation en nutrition animale. Nous avons procédé à la fermentation des fientes par des cultures pures de *Lactobacillus plantarum* et *Pedococcus acidilactici*. Le produit, avant, au cours, et après fermentation, a subi des analyses chimiques et microbiologiques. Le produit obtenu est ensuite utilisé pour substituer les sources de protéines dans la ferme alimentaire de trois lots de poulets. L'ensemble des résultats mis en évidence dans cet ouvrage montrent que non seulement il est possible de transformer par des procédés biotechnologiques les fientes de volailles mais que plus, le produit obtenu constituerait une précieuse composante à valeur ajoutée utilisable dans l'alimentation animale.

Dr M. H. EL JALEL, né à Tata au centre du nord Maroc. A obtenu son Diplôme des études approfondies en Nutrition à l'Université Mohammed VI, Rabat. A réalisé sa Thèse de doctorat au Laboratoire de Microbiologie et Biotechnologie, à l'Institut Agronomique et Vétérinaire Hassan II à Rabat. Enseignant adjoint de l'Institut National d'Hygiène du Maroc.

Mouhammad Halim El Jalel

Recyclage et valorisation des déchets de l'industrie avicole

El Jalel

Le système de santé Marocain a besoin d'une bonne gouvernance et d'une organisation moderne au niveau central. En effet, la réforme du système de santé passe par une réorganisation profonde des services centraux du ministère de la Santé. Le projet de création d'une Agence Nationale de Santé Publique paraît être un des projets porteurs et promoteurs les plus à même d'aider le Maroc à opérationnaliser rapidement cette restructuration inévitable. En effet, cette nouvelle entité devrait voir le jour pour une action plus efficace et surtout efficiente en faveur de l'action Santé publique. Le regroupement de plusieurs organismes existant ayant des missions très proches et qui se chevauchent comme l'Institut National d'Hygiène, l'Institut Pasteur, le Centre Anti-Poison, le Centre National de Radioprotection, l'Ecole Nationale de Santé Publique et plusieurs autres services des D-régions centrales est donc plus recommandable. Les ministères de l'Intérieur et de l'Agriculture ont déjà fait cet exercice de modernisation de l'Administration publique comme par exemple à l'occasion de la création de l'Office National pour la Sécurité Sanitaire des Aliments (ONSSA) en 2009.

Dr M. H. EL JALEL, né à Tata, Maroc. Master en Nutrition-Médecine-Santé à l'Université Mohammed VI, Rabat, Doctorat en Biologie au Laboratoire de Biotechnologie Microbiologie, à BAU Hassan II à Rabat. Membre en Management des Organisations à FOCAL. Part Objectif adjoint de l'Institut National d'Hygiène et Conseiller au 1er Bureau Médical de la Santé.
